

Git, Jenkins and Pytest Lab

Program 1: Git Commands

1. Create a folder on Desktop. 2. Create a GitHub repository. 3. Open Command Prompt in the folder. git init git branch -M main git add . git commit -m "initial commit" git remote add origin https://github.com/username/repository.git echo "my project">README.md git add README.md git commit -m "add README" git push -u origin main

Program 3: Add Jenkinsfile

echo "pipeline {agent any; stages { stage('Checkout'){ steps { git branch: 'main', url: 'https://github.com/username/repo.git', credentialsId: 'your-credential-id' } } }" > Jenkinsfile git add Jenkinsfile git commit -m "Add Jenkinsfile" git push origin main

VS Code - Pytest

Create file: main.py def test_example(): assert 1 + 1 == 2 Run: mvn run python -m pytest main.py
Expected Output: ===== test session starts ===== collected 1
item main.py . [100%] ===== 1 passed in 0.025 sec =====
