

## Program 1

create a folder in desktop and create github repository

open cmd for this folder

```
git init
git branch -M main
git add .
git commit -m "initial commit"
git remote add origin "url of github repo"
echo "my project">README.md
git commit -m "add README"
git push -u origin main
```

##### all above commands as program 1

## next step jenkins as program 3

## after jenkins next return to cmd

```
echo "pipeline {agent any; stages { stage('Checkout'){ steps { git branch: 'main', url:
'https://github.com/username/repo.git', credentialsId: 'your-credential-id' } } }" > Jenkinsfile
```

```
git add Jenkinsfile
git commit -m "Add Jenkinsfile"
git push origin main
```

## open folder in VS Code  
create a file **main.py**

```
def test_example():
    assert 1 + 1 == 2
```

```
## VS Code Terminal
mvn run
python -m pytest main.py
```

---

## Output:

1 passed in 0.025 sec
